

NIKHIL PANDEY

CSE (AI & Machine Learning) · Builder · Technologist · TechPreneur

Email: nikhilpandey.programming@gmail.com Location: Navi Mumbai, India

GitHub: NikhilPandeyBuilds LinkedIn: /in/nikhilpandeybharat

PROFILE I build practical technology products at the intersection of AI/ML, software engineering and real-world problem solving. My work spans full-stack applications, machine-learning workflows, offline-first systems, intelligent interfaces and rapid prototyping. I enjoy turning ambiguous problems into structured systems, working across architecture and implementation, and building products that can move beyond an idea into a usable experience.

PROJECTS

Campus Hub

- Full-stack collegiate platform focused on student services and campus workflows.

DHARTI

- Agriculture intelligence ecosystem built with The Crackerjacks, combining system architecture with speech/ML workflow concepts and offline deployment.

Local Intelligence Layer (LIL)

- Individual architecture project exploring device-resident intelligence and AI operation without cloud dependency.

CareConnect

- Healthcare platform developed with The Crackerjacks, centered on offline-first workflows, structured healthcare schemas and multilingual triage concepts.

Learning Operating System (LOS)

- Education-focused operating-system concept developed around making online education more effective and accessible.

SATHI

- Interactive mental-stress relief companion concept with a smartband blueprint and companion-oriented features.

KDSH

- The Crackerjacks project exploring an applied technology solution for the Kharagpur Data Science Hackathon.

ACHIEVEMENTS

- **Pitchathon 1.0** — First Runner-Up.
- **National Level Hackathon 360° 2.0** — Round 2 finalist / SPOC recognition as represented in the project profile.
- **Hackathon portfolio** — Built and participated across HackQuinox, Hackverse, HackFusion, Genesis, Prosperity Pitch and Pitchathon.

EDUCATION

B.Tech — Computer Science & Engineering

Specialization: AI & Machine Learning

Lokmanya Tilak College of Engineering, Navi Mumbai

Second Year

LEADERSHIP

- **Technical Vidya** — Secretary.
- **CSI LTCE** — Co-Technical Secretary.
- **TechPreneur 1.0** — Part of the organizing team.

COMPETITIONS & BUILDING

- **HackQuinox 2.0** — Competitive product-building experience.
- **Hackverse 2026** — Hackathon participation and project development.
- **HackFusion 2026** — Hackathon participation and solution building.
- **Prosperity Pitch Season 2** — Pitch-focused product experience.
- **NationBuilding Case Study Competition 2026** — Case-study based problem solving.
- **National Level Hackathon 360° 2.0** — National-level competitive build experience.

CERTIFICATIONS

- HackFusion 2026
- Hackverse 2026
- HackQuinox 2.0
- KDSH 2026
- Prosperity Pitch Season 2
- NationBuilding Case Study Competition 2026
- National Level Hackathon 360° 2.0
- Pravah — Build and Ship a Real ML App

TECHNICAL SKILLS

Programming: Python, C++

AI/ML: Machine Learning, NLP, Sentiment Analysis, Generative AI, Agentic AI concepts

Engineering: Web Development, Application Development, Rapid Prototyping, Software Engineering, System Design

Tools: GitHub, VS Code, Docker, Firebase, Figma

Focus: Advanced AI/ML, Cloud Technologies, Product Development

WHAT I BRING

- Translate broad problems into structured product and system ideas.
- Work across AI/ML concepts, application development and system architecture.
- Rapidly prototype, validate and communicate technical ideas through working products and presentations.
- Collaborate effectively in team-based hackathons and technical communities.

CURRENT DIRECTION

Building deeper capability in AI/ML and software engineering while continuing to develop practical, product-oriented systems and compete in technology environments.

BUILDING FOCUS

AI/ML · Full-Stack Systems · Intelligent Applications · Offline-First Thinking · Product Prototyping · System Design · Technical Communities
